

As you can see from the picture, construction of Phase I is quickly coming together. The next step for the canopy will be to finish the underside of the metal work (hide all the beams and electrical), brick work on the vertical steel columns, installation of lights and the wrought iron fence for the playground and the green turf looks great!

The Pre-school playground is scheduled to be completed soon, weather permitting. We will have a “grand opening” once the canopy and playground are completed.

Phase II will be the relocation of the Sunshine Room (Special Needs Ministry) and the architectural drawings of the multi-purpose building. We anticipate beginning Phase II soon after Phase I is completed.

We have close to \$2,000,000 that is available to be applied towards the completion of Project 78. We thank you for your faithful giving and look forward to Impacting more people for Christ.
