

SEXUALITY AND HOMOSEXUALITY

Homosexuality is a touchy topic in our culture today. As you explore the resources below, keep in mind two very important principles:

1. God is sovereign and culture is not. God has clearly established in His word the best way for humans to flourish, which is in submission to Him and His guidelines. This includes (but obviously is not limited to) guidelines about sexuality, and how men and women were designed to be married.
2. We must operate with compassion. We are speaking with real people who are dealing with real issues - we all are. Homosexual sin is no different than heterosexual sin, and we must operate in grace and not judgment towards those struggling with these sins. Christ offers help to live into His design.
